

117TH CONGRESS
1ST SESSION

S. 1172

To direct the Secretary of Transportation to carry out a grant program to support efforts to provide fare-free transit service, and for other purposes.

IN THE SENATE OF THE UNITED STATES

APRIL 15, 2021

Mr. MARKEY introduced the following bill; which was read twice and referred to the Committee on Banking, Housing, and Urban Affairs

A BILL

To direct the Secretary of Transportation to carry out a grant program to support efforts to provide fare-free transit service, and for other purposes.

1 *Be it enacted by the Senate and House of Representa-*
2 *tives of the United States of America in Congress assembled,*

3 SECTION 1. SHORT TITLE.

4 This Act may be cited as the “Freedom to Move Act”.

5 SEC. 2. PURPOSE.

6 The purposes of this Act are—

7 (1) to invest in the efforts of States, counties,
8 and local municipalities to provide fare-free public
9 transportation; and

1 (2) to support States, counties, and local mu-
2 nicipalities in improving and expanding access to
3 safe, accessible, and reliable mass transit systems in
4 order to improve the livability of communities.

5 **SEC. 3. FINDINGS.**

6 Congress finds the following:

7 (1) Increasing access to safe, reliable, and af-
8 fordable public transit systems, including buses,
9 light rail, and subways can help increase community
10 livability and access to critical services such as edu-
11 cation, jobs, and healthcare.

12 (2) The cost of transit fares can act as a chal-
13 lenging economic barrier for low-income individuals
14 and families who are most likely to rely on public
15 transportation to access critical services and must
16 spend larger parts of their household budget on
17 transportation services. Removing economic barriers
18 to safe, reliable, and affordable public transit can
19 help to increase social and economic mobility by in-
20 creasing access to education, training, and employ-
21 ment.

22 (3) Individuals with disabilities are twice as
23 likely as those without disabilities to have inadequate
24 access to safe, affordable, and reliable transpor-
25 tation. Reports have found that of the nearly

1 2,000,000 people with disabilities who are unable to
2 leave their homes, nearly 30 percent are unable to
3 do so due to a lack of adequate transportation.

4 (4) As the senior population continues to grow,
5 an increasing number of elderly adults depend on
6 public transit to access medical care and other vital
7 services. Additionally, the percentage of 13- to 34-
8 year-olds without a driver's license continues to
9 grow. Taken together, these trends show the unprece-
10 dented urgency of investing in and improving the
11 public transit systems of the United States.

12 (5) According to the Department of Transpor-
13 tation, transportation accounts for 29 percent of
14 greenhouse gas emissions in the United States. Pub-
15 lic transportation, however, produces significantly
16 lower greenhouse gas emissions per passenger mile
17 than transportation by private vehicles. Increasing
18 public transit ridership and moving more people to
19 and from critical services with fewer vehicles on the
20 road can reduce greenhouse gas emissions.

21 (6) Eliminating transit fares and significantly
22 reducing economic barriers to public transit will help
23 to reduce the need for fare evasion policies that dis-
24 proportionately criminalize low-income individuals
25 and people of color.
